

Atty Docket No. PC27840A  
Appl. No. 10/772527  
Reply to Office action of January 24, 2007

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) A process for the production of steroid compounds of Formula II

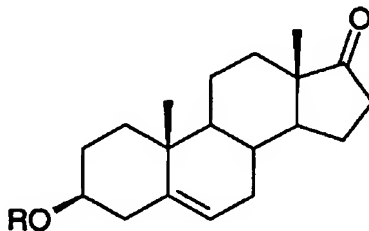

**Formula II**

wherein R is:

-H or -CO-R1;

wherein R1 is C1-C5 alkyl;

by fungal dihydroxylation of steroid compounds of Formula I

**Formula I**

comprising contacting a steroid of Formula I with a biotransformation culture containing a species of the genus *Fusarium culmorum* ATCC PTA-5697 capable of 7 $\alpha$ ,15 $\alpha$  dihydroxylation.

2. (cancelled)
3. (currently amended) A process for producing steroids of Formula II according to Claim 2 further comprising the steps of:
- preparing a primary seed culture of *Fusarium culmorum* ATCC PTA-5697;
  - preparing a secondary seed culture using the culture of step a);
  - preparing a tertiary culture for biotransformation using the culture of step b);
  - adding a steroid of Formula I to the culture of step c);
  - collecting the solids from the culture of step d); and
  - extracting the solids of step d);

Atty Docket No. PC27840A

Appl. No. 10/772527

Reply to Office action of January 24, 2007

4. (original) A process for producing steroids of Formula II according to Claim 1 wherein the biotransformation culture contains a surfactant.
5. (currently amended) A process for producing steroids of Formula II according to Claim 4 wherein the surfactant is a non-ionic detergent selected from the group consisting of non-ionic amides, non-ionic esters, ~~such as~~ ethoxylated alkyl phenols, polyethylene sorbitan esters, emulsifying waxes, non-ionic ethoxylates, tristyrylphenol ethoxylates, alcohol ethoxylates, ethoxylated mercaptans, capped ethoxylates, block copolymers, and reverse copolymers.
6. (original) A process for producing steroids of Formula II according to Claim 5 wherein the surfactant is an ethoxylated alkyl phenol.
7. (original) A process for producing steroids of Formula II according to Claim 6 wherein the ethoxylated alkyl phenol is octylphenoxypolyethoxyethanol.
8. (original) A process for producing steroids of Formula II according to Claim 6 wherein the ethoxylated alkyl phenol is nonylphenoxypolyethoxyethanol.
9. (original) A process for producing steroids of Formula II according to Claim 1 wherein the biotransformation culture contains a natural oil.
10. (original) A process for producing steroids of Formula II according to Claim 9 wherein the natural oil is selected from the group consisting of castor oil, corn oil, cottonseed oil, lard oil, linseed oil, olive oil, peanut oil, rapeseed oil, safflower seed oil, soybean oil, sunflower seed oil, and wheat germ oil.
11. (original) A process for producing steroids of Formula II according to Claim 10 wherein the natural oil is soybean oil.
